#effectfilter
For random, multi-colored streak effects

Description
True-Streak® Confetti creates random bursts of colors around pointed light sources. These streak effects differ in length, thickness and position. They are caused by small, multi-colored tubes that are scattered randomly within the filters' layers - like confetti.

Application
This exciting and fun filter is the perfect match for creative projects, such as music videos or concert footage. Depending on the lighting, it can go from subtle beauty to dramatic super pop.

Key Features

- Random bursts of colors
- Streaks vary in color, length, thickness and position
- Emanate from bright light points
- Every filter is unique
